

## Smart Green Case Description

|                                        |              |
|----------------------------------------|--------------|
| Product Life                           | * 15–20 year |
| Assembled                              | Robotically  |
| Disassembled                           | Robotically  |
| Assembled                              | Manual Tool  |
| Disassembled                           | Manual Tool  |
| Cleaning                               | Robotically  |
| Add Info                               |              |
| Note:                                  |              |
| * 15–20 year with normal wear and tear |              |

**1 Ton of cardboard boxes is the equivalent of 17 Trees**

1 case = 2 lb.

1,300,000 cases = 2,600,000 lb.

or

1300 Tons x 17 trees

**Saves**

**22,100 Trees per year**

## SMART GREEN CASE

By Nutrend Industries

# SMART GREEN CASE

PATENT PENDING

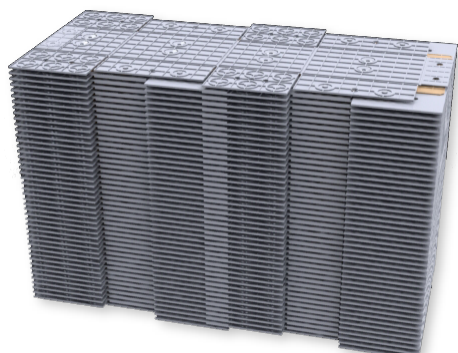

## The Smart Green Case

Introducing the Smart Green Case “patent pending” by Nutrend Industries. The name, Smart Green Case is a combination of words from the product’s description and function.

“**Smart**” stands for its inventory track abilities. The RF tag broadcast inventory control and management data at manufacturer and distribution warehouse.

“**Green**” is because it is environmentally friendly. This case is created from recycled products. Designed to last years, replacing the traditional cardboard box, thus reducing our carbon footprint.

“**Case**” is because it’s more than a box. The Smart Green Case looks like a traditional cardboard box in the way that it opens and closes with flaps but it does not require tape or glue to secure it but a locking system called Vac-lock.

The Smart Green Case contains an optional 5 piece baffle component that divides the inside of the Smart Green Case into sections for transporting bottles or for insulating fragile items.

## Shipping and Return System

When the Smart Green Case is not in use it can be disassembled into a one piece flat mat, stacked and bundled for easy storage.

## Our Prestigious Client

The project objective is to design a GREEN alternative case solution to replace the \$1.3 mil. worth of cardboard cases disposed of each year by Client.

The Green Case is the solution that will:

- meet your packaging needs
- help the economy
- relieve the echo system
- give you tax credit for going Green
